INTRAVENOUS DRUGS AND DEVICES

Our FirstChoice® line offers a comprehensive array of injectable drugs — virtually all injectable drugs used in everyday practice — to ensure increased efficiency, better patient tolerance, a wider therapeutic window and improved patient stability. Abbott is the leading manufacturer of injectables used throughout the hospital.

In addition, Abbott provides a broad range of drug delivery systems.

- ◆ Carpuject® prefilled syringes, for both needle and needlefree systems, are available with many drugs in the FirstChoice lineup.

Carpuject®

- ◆ FirstChoice® Premixes, available in more than 130 choices and doses, are the ultimate in efficiency for pharmacy and nursing alike.

FirstChoice® Premixes

- ◆ The ADD-Vantage® System helps you save time and reduce waste with more than 95% of the drugs you use every day.

IV SETS

Abbott offers a full line of I.V. sets, many with the following features, offering both convenience and safety:

- ◆ The LifeShield® needlefree system cuts the use of needles in drug administration to a fraction and is available in virtually every I.V. configuration that Abbott makes.

LifeShield®

- ◆ The CLAVE® system provides an integral swabbable valve for easy needlefree I.V. access that never needs capping.

DESCRIPTIONS/DEFINITIONS

Abbott's LifeCare® (flexible plastic) and Abbo-Vac® (glass) I.V. delivery systems offer both a flexible plastic I.V. container system as well as a totally closed glass container system.

Partial-fill and ADD-Vantage® diluent containers complete the line and facilitate additive procedures.

Abbo-Vac® Glass Containers

Glass container with pre-bored butyl rubber stopper to accept vented administration sets. Available in 150 mL, 250 mL, 500 mL and 1000 mL sizes.

LifeCare® Flexible Containers

I.V. container in flexible plastic available in the following sizes: 150 mL, 250 mL, 500 mL and 1000 mL for use with nonvented administration sets.

ADD-Vantage® System

Using two components, the specially designed ADD-Vantage diluent container and drug vial, drugs can be prepared in seconds without needles, syringes or alcohol swabs. Liquid or powdered medications are provided in a threaded vial that mates with the top of flexible diluent bags in 50, 100 or 250 mL sizes. All ADD-Vantage vials are glass encased in plastic.

The ADD-Vantage design keeps drug and diluent separate until the system is activated just prior to administration. The ADD-Vantage system requires no refrigeration, freezers or other special storage conditions.

Assembled but not activated ADD-Vantage systems can be stored for up to 30 days out of the overwrap. ADD-Vantage diluents are listed in this section on page A5. ADD-Vantage drugs are listed on pages C17 & C18.

Additive Volumes for LifeCare Flexible Containers

Container Size (mL)	Maximum Additive Volume (mL)		Total Available Volume (mL)	
	With Air	Without Air	With Air	Without Air
150	+180	+190	330	340
250	+85	+100	335	350
500	+145	+200	645	700
1000	+150	+205	1150	1205

Additive Volumes for LifeCare Partial-Fill Flexible Containers

Container Size (mL)	Maximum Additive Volume (mL)		Total Available Volume (mL)	
	With Air	Without Air	With Air	Without Air
25	+65	+70	90	95
50	+65	+70	115	120
100	+65	+70	165	170
